

FOR IMMEDIATE RELEASE

How2Recycle®

Inline Plastics Products are Pre-Qualified

SHELTON, Conn. – February 6, 2024 – Inline Plastics is thrilled to announce that they have pre-qualified all their products with the How2Recycle® labeling system. This is a significant milestone that will help processors and retailers properly label packaged fresh foods.

The How2Recycle label is a standardized labeling system that clearly communicates disposal instructions to the public. The How2Recycle program provides a standardized labeling system that helps consumers understand how to recycle or dispose of different types of packaging materials. The pre-qualification process helps vet packages for brands. The recyclability of structures can change due to product application, attachments, and other factors by the brand or customer utilizing the pre-qualified material. Companies must be active How2Recycle members to utilize the label on their package.

“We are excited to be part of the How2Recycle program and to be able to provide our customers with clear and accurate recycling information,” said Carrie Cline, Senior Brand Manager. “This is a reflection of our dedication to sustainability and our commitment to making a positive impact on the environment.”

Pre-qualifying products with How2Recycle is a testament to dedication to a better world for customers, employees, and communities. Inline Plastics is proud to be part of over 500 brand owners and retailers who are members of How2Recycle, and tens of thousands of products that carry the How2Recycle label in the marketplace.
