## **Inline Plastics Introduces Safe-T-Chef® 9×9 Compartmented Containers**

### **A Great Divide: The Perfect Solution for Food Service and Retailers!**

**SHELTON, CT – August 26, 2025** – Say goodbye to jumbled take-out! Inline Plastics unveils its innovative Safe-T-Chef® 9×9 footprint three-compartment container (SKU C9940C3D), strategically designed to transform the take-out and third-party delivery experience. This 40oz marvel combines visibility, security, and functionality to address the growing demands of modern food service.

The generous dimensions (exterior: 9.3" × 9.4" × 2.5") feature a thoughtfully designed interior with one 23.5oz section (7.8" × 4.0" × 2.3") and two 8.6oz sections (3.8" × 3.6" × 2.3"). This intelligent configuration keeps components isolated and prevents flavors from mingling during transport – solving a common frustration with traditional packaging.

Crafted from crystal-clear polypropylene, this container showcases culinary creations while its specialized design prevents shifting and sliding while on the road. The patented tamper-evident and tamper-resistant features provide crucial security through multiple handling points, enhancing confidence for both businesses and consumers.

Food service operators will appreciate the versatility across numerous applications. The container performs seamlessly in various environments – from refrigerated storage to heat lamps and microwaves.

Retailers can also appreciate the multi-functionality of keeping food separate and fresh, making it ideal for deli counters, grab & go sections, sandwiches, salads, and snacks.

The secure seal prevents leakage while ensuring contents arrive in peak condition, preserving both presentation and taste from kitchen to doorstep – delivering the wow-factor customers crave and restaurants strive to achieve!

Inline Plastics continues to pioneer packaging innovations that meet evolving market demands. To explore the full range of solutions, visit the [new digital catalog](#).

### **About Inline Plastics**

Inline Plastics, headquartered in Shelton, CT, is the leading manufacturer of innovative, high-quality, crystal-clear food packaging with over 55 years of experience. The company transformed the marketplace with its Safe-T-Fresh® line, a tamper-resistant and tamper-evident product that utilizes its patented technology, providing retailers and consumers with greater product protection. They continue to design and manufacture packaging solutions that keep food products safe and fresh and enhance shelf merchandising. The company also offers the most complete line of automated equipment to close, lock, and label their packaging.
