For Immediate Release

Krack Introduces Variable Speed Technology for Condensers

Vspeed provides energy and maintenance savings while delivering optimal performance

BOLINGBROOK, IL (USA), March 6, 2020 - Krack by Hussmann is pleased to announce the availability of a high-performance electronic drive and motor solution for its Levitor and Microchannel condensing systems. The new Krack® Vspeed systems use variable speed technology that improves energy efficiency and savings, operational performance while reducing system wear and tear on components.

“Our new Vspeed technology provides constant load matching to capacity which decreases wattage used when the system is not running at full capacity,” said Ron Grabowski, Senior Product Manager for Krack. “With the cost of Vspeed much lower than other electronically commutated fan assemblies, customers can expect a quick payback with energy savings regardless of electricity costs.”

Another great benefit with Vspeed technology is that sound levels are greatly reduced versus staging of full speed fans with a linear decibel reduction based on fan speed.

Vspeed applications include Krack® Levitor II LAVK and Microchannel MXK air cooled condensers with 230/3 and 460/3 voltage options. The fans run up to 1140 RPMs with a 1.5 horsepower motor. Retrofit installations are simple with an easy drop-in solution for motor and drive with Krack condensers.

About Krack
For more than 85 years, Krack has been committed to delivering products with design leadership and innovation that provide customer-focused solutions for all your commercial refrigeration needs. Krack by Hussmann is a world leader in the development, manufacture and sale of commercial coils, condensers, condensing units and process cooling equipment. Customers served by Krack include the retail food industry, commercial refrigeration contractors, refrigeration contractors using halocarbon, HVAC contractors, refrigeration OEMs, process cooling businesses, food and beverage manufacturers, air solutions manufacturers, walk-in cooler and fixture manufacturers and other businesses requiring commercial refrigeration equipment. Krack is an industry leader in reliability, energy efficiency and overall equipment performance. For more information about Krack, please visit www.krack.com.

About Hussmann Corporation
Hussmann Corporation, a wholly owned subsidiary of Panasonic North America, promises to continuously provide the most customer-focused solutions in the food retailing industry. For more than 100 years we have been the innovation and technology leader delivering the broadest and most comprehensive solutions to our market. Core capabilities include merchandising/shopper engagement, refrigeration, asset optimization, and supply chain management that address the critical needs of food retailers to increase sales, reduce costs, and increase shopper loyalty. We collaborate with customers across a variety of food retail segments as we work towards fulfilling the Hussmann Promise to deliver better businesses, better partners and a better world. For more information about Hussmann, please visit www.hussmann.com.
