Bradley Adds Four New Elvari® Accessory Models Designed to Elevate Washroom Functionality and Serviceability

MENOMONEE FALLS, WIS., (April 21, 2026) — Bradley Company announces the expansion of its popular [Elvari® Washroom Accessories Collection](#) with four new accessory models designed to increase restroom design options while supporting greater operational efficiency for facility teams. The new models include a [Recessed Combination Unit](#), [Recessed Paper Towel Dispenser](#), [Jumbo Toilet Paper Dispenser](#), and [Free-Standing Waste Receptacle](#) – each featuring Elvari’s refined modern aesthetic with seamless curves, premium stainless-steel construction, and coordinated finish options.

“Elvari has become a preferred accessories collection for designers and specifiers seeking a more elevated, unified restroom environment,” says Melissa Schulz, associate product manager, Bradley Company. “Recognized with multiple product design awards, the collection continues to expand with new Elvari models that broaden coordinated design options while helping facilities improve day-to-day servicing efficiency.”

New Elvari Models Expand Versatility Across Restroom Layouts

Elvari Recessed Combination Unit (Paper towel and waste)

Bradley’s new Elvari recessed combination unit provides a streamlined, all-in-one solution that combines a folded towel dispenser with an integrated waste receptacle. It supports efficient

maintenance with a bag retention ring, a concealed BradLock™ magnetic locking system, red low-level indicator, and small/medium/large capacity options.

Elvari Recessed Paper Towel Dispenser

To meet varying restroom configurations and usage demands, the Elvari paper towel dispenser is offered in recessed mounting, with small, medium, and large capacities. Like other Elvari accessories, it features refined construction, a concealed BradLock magnetic locking system and a red low-level indicator to support faster and easier servicing.

Elvari Jumbo Roll Toilet Paper Dispenser

The new Elvari jumbo roll toilet paper dispenser provides a modern alternative to traditional dispensers while maintaining practical capacity for high-traffic facilities. The cabinet holds one jumbo roll up to 10-inch diameter and features a low-level indicator and BradLock magnetic locking system to enhance servicing.

Elvari Free-Standing Waste Receptacle

The new Elvari free-standing waste receptacle supports a premium aesthetic while helping facilities maintain cleaner, more organized restrooms. It features a sleek pill-shaped design, bag retention ring, optional cover, and a 21-gallon capacity suited for high-use environments. For restroom users, its free-standing placement provides convenient, easy-access waste disposal – supporting a cleaner, more functional restroom.

Coordinated Finishes Deliver a Unified Look with Easier Maintenance

Each new model is available in coordinated finish options – Brushed Black, Brushed Stainless, Brushed Bronze, Brushed Brass, Brushed Nickel, and Satin Stainless – making it easy to specify a unified, high-end restroom environment. Elvari's durable e-coat finishes also support long-term performance in high-traffic facilities by resisting fingerprints, water spots and corrosion – helping accessories stay cleaner-looking and easier to maintain over time.
