

FOR IMMEDIATE RELEASE

Inline Plastics Expands Award-Winning Safe-T-Chef® with New 9x9 Footprint

Shelton, CT– March 25, 2025 – Hot food packaging just got cooler. Inline Plastics is heating up the food packaging scene with new additions to its Safe-T-Chef® line, announcing a strategic expansion with two state-of-the-art 9x9 options. These new offerings represent the latest evolution in foodservice packaging, built on Inline's patented tamper-protection technology that revolutionized the industry.

Perfect timing? You bet. The expanded Safe-T-Chef® line addresses surging demand from grocery retailers, restaurants, and delivery services for secure, sustainable hot food packaging. Crafted from premium polypropylene, these containers deliver superior performance while maintaining the brand's commitment to food safety and environmental responsibility.

"Let's face it, the food industry never stands still," said Marlene Bautista, Product Portfolio Manager at Inline Plastics. "Today's foodservice operators need packaging that does more than just contain food – they need solutions that protect integrity, ensure safety, and support sustainability goals. Safe-T-Chef® delivers on all fronts."

Key Features

- **Tamper Evident & Tamper Resistant:** First-of-its-kind tamper protection in polypropylene containers.
- **Sustainability:** All-clear material makes it easier to sort at material recovery facilities, supporting sustainability efforts.
- **Versatility:** Engineered for hot food applications, the containers maintain integrity during transport and delivery.
- **Two New Items:**
 - [C9944D](#): A standard model designed for a variety of applications.
 - [C9944DV](#): A vented option with anti-fog technology to ensure visibility and maintain food quality.

###
