Jernigan Oil Launches LottoShield Across Its 56-Store Duck Thru Food Stores Network

SAN RAMON, CA., June 20th, 2023 — Jernigan Oil, operator of the Duck Thru Food Stores brand, known for their commitment to high-quality service and operational efficiency, has recently launched LottoShield, an industry-leading lottery management solution, across their 56-store network. This move highlights their commitment to leveraging cutting-edge technology to streamline operations.

LottoShield has developed a revolutionary solution that integrates with state lotteries and Point-of-Sale systems to significantly optimize and secure the lottery category. By automating inventory reconciliation, invoice processing, and manual entry, LottoShield reduces the daily time spent on lottery management to just a few minutes. Moreover, LottoShield strengthens loss prevention efforts by reducing the time it takes to discover theft down to 24 hours or less, making it substantially harder for theft to continue unnoticed.

Miles Harrell, VP of Retail Operations at Jernigan Oil, shares his experience: "LottoShield has helped our organization tremendously. Our team members are spending less time on lottery reconciliation paperwork and have more time to perform other job duties. This has hopefully allowed us to provide better customer service and maintain cleaner stores. We are happy to be partnered with LottoShield."

“Lottery drives foot traffic and increases basket size, but the manual and error prone accounting process often exposes retailers to the risk of internal theft. At LottoShield, our goal is to protect retailers from these challenges. Working with Jernigan Oil, a respected leader in North Carolina and Virginia’s convenience retail space, has been a pleasure. Their adoption of LottoShield has led many of their peers to follow suit.” states Mehdi Mahmoodi, Co-founder of LottoShield.

###

About LottoShield:
LottoShield has launched a revolutionary new lottery tracking system that eliminates the manual, time-intensive process of lottery reconciliation and provides retailers with strong protection from all kinds of lottery theft. The LottoShield scanner allows cashiers to audit inventory in just seconds, without entering ticket or bin numbers manually. LottoShield is also the only system that automatically tracks your invoices and reports from the state lottery to monitor confirmed packs, activations, online lotto sales, payouts, and more. Since 2021,
LottoShield has been adopted by hundreds of retailers across the US ranging from single-site operators to 450+ site chains.
