Your Right To Know

A Training Aid Provided By:

SSDC
4050 Corporate Drive, #100 • Grapevine, Texas 76051 • 972-355-6900 • 1-800-532-7732
This HAZARD COMMUNICATION PROGRAM Will Address
Occupational Safety and Health Administration’s
Hazard Communication Standard
For Proper Handling Of Hazardous Chemicals In The Work Place.

Managers,
It is required by law that all employers provide a comprehensive, written Hazard Communication for their employees concerning chemical safety in the workplace. This communication must be available for any employee or Official from OSHA or The Department of Labor at the time of request.

OSHA requires in this communication:
• A List of all Chemicals, hazardous or not, used in the work place.
• A Material Safety Data Sheet (MSDS) for each of these chemicals.
• A training program on chemical hazards in the work place.
• Properly labeled containers to identify hazards.
• Documentation that every employee has received this training on an annual basis.

This Hazard Communication Program was designed to assist you in complying with OSHA (Title 29, 1910.1200) Hazard Communication regulations. However, it does not address additional state or local regulations you must also comply with. This program was designed to provide information covering its subject matter at the time of its preparation. SSDC takes no legal responsibility or obligation in interpretation of the laws or regulations. Federal, State and Local Laws may vary, so please consult with your legal adviser to assure your restaurant meets all applicable health and safety regulations.

We hope this Hazard Communication Program will be an asset in your employee training. If you have any questions concerning this program, please contact SSDC at 1-800-532-7732.
As an employee, it is your Right-To-Know what the potential hazards are, if any, of the cleaning chemicals you come into contact with.

Please read the Training Guide before you begin your employee training.

We suggest the enclosed appendixes “A” through “D” be copied and used as handouts during your employee training.

APPENDIX
“A” Cleaning Chemicals
“B” Terminologies & Definitions
“C” How to interpret a Material Safety Data Sheet
“D” Labeling Requirements
“E” Employee Confirmation Training Log
“F” Additional Chemicals Listing
Cleaning Chemicals
(See APPENDIX “A”)

APPENDIX “A” contains the list of cleaning chemicals provided by SSDC with HMIS Health Hazard Ratings.

Please Note: HMIS Health Hazard Ratings are not required under the Right-To-Know laws, but you may find it useful in understanding how Caution and First Aid Statements on your cleaning products are determined.

OSHA has a standard for Hazardous Material Identification System, or HMIS. This rating system is very similar to the National Fire Protection Association, or NFPA, Standard 704 in making signs to identify the hazards of materials. Both of these systems cover Health, Flammability, and Reactivity by utilizing a number system to quickly identify any hazard a chemical may have. It is the manufacturer’s responsibility to determine the potential of their product and assign the corresponding number according to its hazardous potential. Similar products may have different ratings depending on the manufacturer.

HMIS numeric system
0 = Minimal, 1 = Slight, 2 = Moderate, 3 = Serious, 4 = Severe.

EXAMPLES
1 may represent; CAUTION: May Cause Eye and/or Skin Irritation.
2 may represent; WARNING: Causes Eye and/or Skin Irritation.
3 may represent; DANGER: Causes Eye and Skin Burns.
4 may represent; TOXIC: Poison.

We have our products analyzed by independent laboratories to assure that the cleaners you use meet product specifications for health and safety.

It is your choice to you use the HMIS Health Hazard Ratings in your employee training.
Chemical Terminologies & Definitions
(See APPENDIX “B”)

The terminologies and definitions used in this appendix are classified as your Right-To-Know information. This does not mean the cleaning chemicals you use carry these warnings, but these terms need to be understood by all employees.

How to Interpret a Material Safety Data Sheet
(See APPENDIX “C”)

This appendix is self explanatory. The MSDS is divided into 16 sections with explanations in each section.

Labeling Requirements
(See APPENDIX “D”)

This appendix is a sample product label with the sections illustrated for training purposes.

Employee Confirmation Training Log
(See APPENDIX “E”)

Every employee, by law, must go through a Hazard Communication Program. We suggest this be a part of the employee’s orientation and administered at least annually thereafter. Every employer must keep a record of this training. This appendix is a log for this confirmation. If you require additional logs, call customer service at 1-800-532-7732, and we will be happy to mail them to you.

Additional Chemicals Listing
(See APPENDIX “F”)

This appendix is for any other cleaning chemicals you have in your restaurant that are not covered in this communication. List these items in your log and be sure you have a Material Safety Data Sheet for each product.

- The products with a “1” under Health would mean, CAUTION: May Cause Eye and/or Skin Irritation.
- The products with a “2” under Health would mean, WARNING: Causes Eye and/or Skin Irritation.
- The products with a “3” under Health would mean, DANGER: Causes Eye and/or Skin Burns.
- The products with a “4” under Health would mean, TOXIC: Poison.

It is the manufacturer's responsibility to rate their products, so similar products may have different ratings depending on the manufacturer.
**Hazardous Chemical** by OSHA’s definition is any substance or mixture that can produce negative effects on the health or safety of a person. These negative effects are broken into two categories, Physical and Health.

**Physical Hazard** by definition is a situation where a chemical has the potential of reacting.  
**EXAMPLE:** Flammable products, such as alcohol and gasoline, would have the potential of starting a fire under the right circumstances.

**Health Hazard** by definition is the potential the chemical has on directly affecting a person, whether it be instantaneous (Acute) or over an extended period of time (Chronic).

**Acute** is defined as the short-term physical reaction of the body after overexposure.  
**EXAMPLE:** Eye irritant, such as getting shampoo, hand soap or dish detergent in your eyes.

**Chronic** is defined as the long-term physical reaction of the body after overexposure.  
**EXAMPLE:** Carcinogenic, such as developing lung cancer from asbestos.

**Irritant** is defined as having the potential of causing irritation, especially physical irritation.  
**EXAMPLE:** Tobacco smoke is a common eye irritant.

**Corrosive** is defined as having the capability or tendency to cause corrosion.  
**EXAMPLE:** The adverse effect of a corrosive acid on metal or skin.

**Toxic** is defined as capable of causing injury or death, especially by chemical means.  
**EXAMPLE:** A source of toxicity would be Cyanide or Hemlock.

**Exposure Limits**, defined by OSHA as Permissible Exposure Limit, or PEL, which is calculated on an eight hour exposure without an acute effect.  
**EXAMPLE:** Isopropyl Alcohol CAS# 67-63-0 has a 400 ppm PEL exposure limit. This is the Rubbing Alcohol you can by in any grocery store. More than 400 ppm exposure could cause an acute effect, such as drying and cracking of the skin.

**Allergic** is characterized by, or caused by, an allergy or reaction to something such as a chemical.  
**EXAMPLE:** Everyone is different. A bee sting to most is an irritant. To some, it can have an adverse effect. An example of an allergic chemical reaction could be a skin rash.

**Flammable** is defined as easily ignited and capable of burning rapidly.  
**EXAMPLE:** Gasoline

**Combustible** is defined as capable of igniting and burning.  
**EXAMPLE:** Cardboard boxes
MATERIAL SAFETY DATA SHEET

How to interpret a Material Safety Data Sheet

SECTION 1 - COMPANY NAME
Name of product and/or product ID number.
Name, address and phone number of manufacture.
24 hour emergency response phone number.

SECTION 2 - INFORMATION ON INGREDIENTS
Cas Names   Cas#
Cas Names: Chemicals used in manufacturing of the product with a HMIS rating greater than a 2. (See section 3)
Cas# (Chemical Abstract Service Registration Number)

SECTION 3 - HAZARDS IDENTIFICATION
OSHA HMIS (Hazardous Material Identification System) For Health, Fire & Reactivity
0 = Minimal, 1 = Slight, 2 = Moderate, 3 = Serious, 4 = Severe.
1 for example may represent; CAUTION: May Cause Eye and/or Skin Irritation.
2 for example may represent; WARNING: Causes Eye and/or Skin Irritation.
3 for example may represent; DANGER: Causes Eye and/or Skin Burns.
4 for example may represent; TOXIC: Poison.

Health would cover direct routes of entry (eye and skin contact, ingestion and inhalation)
Fire would cover flammable potential.
Reactivity would cover if and how reactive the product was with water or any material.

ACUTE:
The short-term physical reaction of the body after overexposure.

CHRONIC:
The long-term physical reaction of the body after overexposure.

SECTION 4 - FIRST AID MEASURES
What to do if overexposure or accident occurs.

SECTION 5 - FIRE FIGHTING MEASURES
What to do if product has a special fire fighting hazard.

SECTION 6 - ACCIDENTAL RELEASE MEASURES
What to do if product is spilled.

SECTION 7 - HANDLING AND STORAGE
What precautions to use when handling or storing the product.

SECTION 8 - CONTROLS / PERSONAL PROTECTION
What equipment, if any, is required when handling the product.

SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES
Physical characteristics of the product.

SECTION 10 - STABILITY AND REACTIVITY
What conditions or substance, if any, the product will react with.

SECTION 11 - TOXICOLOGICAL INFORMATION
What, if any, toxic or carcinogens (cancer-causing agents) the product contains.

SECTION 12 - ECOLOGICAL INFORMATION
What, if any, chemicals contained in the product are harmful to the environment.

SECTION 13 - DISPOSAL CONSIDERATIONS
State regulations may vary, but as a standard, no open dumping or disposing of in streams or water ways is allowed.
Proper disposal of used waste products would be in a sanitary sewer.

SECTION 14 - TRANSPORTATION INFORMATION
Proper shipping name for transportation.
Governed by DOT (Department of Transportation)

SECTION 15 - REGULATION INFORMATION
If product contains any regulated materials or is an approved product by any Government Agency.

SECTION 16 - OTHER INFORMATION
Last time the MSDS was updated, name of person or persons involved in the preparation of, and any other information the manufacture is required to disclose.
As a manufacturer we are required by OSHA to have:

1. The identity of the product that links the product to the MSDS. (Product Name)
2. The hazard warnings. (Caution and First Aid Statements)
3. The name and address of the manufacturer. (SSDC, Inc.)
4. In addition, the Department of Transportation requires that all shipping containers contain a 24-hour Emergency Hot Line.

Medical Emergency, Call (800)391-1504

CAUTION: May cause eye irritation. Repeated or prolonged contact with irritants may cause dermatitis. Avoid contact with eyes. Avoid breathing vapor or mist. Keep container closed. Use only with adequate ventilation. Wash thoroughly after handling.

FIRST AID MEASURES
EYES: In case of contact, immediately flush eyes with cool running water. Remove contact lenses and continue flushing with plenty of water for at least 15 minutes. Get medical attention if irritation persists.
SKIN: Flush contaminated skin with plenty of water. Wash clothing before reuse.
INHALATION: If inhaled, remove to fresh air.
INGESTION: Do not induce vomiting. Never give anything by mouth to an unconscious person. If irritation persists, get medical attention.

Contains/Contiene:
Water (7732-18-5), Sodium Hypochlorite (7681-52-9), Sodium Octyl Sulfate (142-31-4).

See Material Safety Data Sheet

Formula Contains No Phosphates

DIRECTIONS FOR USE
READY TO USE. Use in a well-ventilated area. Turn nozzle counterclockwise to open.
1. Hold bottle 4-6 in. (10-15 cm) from surface and spray.
2. Allow contact with surface for 2-5 minutes. For additional grout-whitening power, allow additional contact time.
3. Wipe, then rinse with water. Repeat for stubborn stains.

NOTE: This product not for use as a hard surface sanitizer or disinfectant. Avoid contact with clothes, fabric, carpeting, wood, aluminum, and painted surfaces. Prolonged contact may cause discoloration.

IMPORTANT
Diluted cleaning products in trigger sprayer bottles require proper labeling.

The container label will contain most of the information you need, but it is the Material Safety Data Sheet that contains “all the information” for Your Right-To-Know. Know where the Material Safety Data Sheets are in your restaurant and review them as often as necessary.

If you require additional Material Safety Data Sheets, call 1-800-532-7732.
By signing this form, I hereby acknowledge that I have completed this Hazard Communication Program and understand all contents and requirements within.

Section 3. Hazards identification

Physical state: Liquid, [Gel]

Emergency overview: FLAMMABLE LIQUID AND VAPOR. MAY CAUSE EYE IRRITATION.

Potential acute health effects

Eyes: Slightly irritating to the eyes.

Skin: No known significant effects or critical hazards.

Inhalation: No known significant effects or critical hazards.

Ingestion: No known significant effects or critical hazards.

See toxicological information (section 11)

Section 4. First aid measures

Eye contact: In case of contact, immediately flush eyes with plenty of water. Remove contact lenses and flush again. Get medical attention if irritation persists.

Skin contact: In case of contact, immediately flush skin with plenty of water. Wash clothing before reuse.

Inhalation: If inhaled, remove to fresh air.

Ingestion: Do not induce vomiting. Never give anything by mouth to an unconscious person. If irritation persists, get medical attention.

Section 5. Fire fighting measures

Flash point: 22.2222 °C (Closed cup)

Hazardous thermal decomposition products: Decomposition products may include the following materials: carbon dioxide, carbon monoxide

Fire-fighting media and instructions: Use dry chemical, CO₂, water spray (fog) or foam.

Use water spray to keep fire-exposed containers cool. Dike area of fire to prevent runoff. Flammable liquid. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard.

Section 6. Accidental release measures

Personal precautions: No special measures required.

Environmental precautions: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Methods for cleaning up: For small spills, add absorbent (soil may be used in the absence of other suitable materials). Scoop up material and place in a sealable, liquid-proof container for disposal.

Section 7. Handling and storage

Handling: Avoid contact with eyes. Keep away from heat, sparks and flame. To avoid fire, eliminate ignition sources. Wash thoroughly after handling.

Storage: Keep out of reach of children. Store in a segregated and approved area. Keep container in a cool, well-ventilated area. Keep container tightly closed and sealed until ready for use. Avoid all possible sources of ignition (spark or flame).

Do not store above the following temperature: 25°C

Section 8. Exposure controls/personal protection

Engineering measures: No special ventilation requirements.

Personal protection:

Section 10. Stability and reactivity

Stability: The product is stable. Under normal conditions of storage and use, hazardous polymerization will not occur.

Hazardous decomposition products: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Hazardous polymerization: Under normal conditions of storage and use, hazardous polymerization will not occur.

Section 11. Toxicological information

Potential acute health effects

- Eyes: Slightly irritating to the eyes.
- Skin: No known significant effects or critical hazards.
- Inhalation: No known significant effects or critical hazards.
- Ingestion: No known significant effects or critical hazards.

Potential chronic health effects

- Target organs: Contains material which may cause damage to the following organs: blood, the reproductive system, liver, upper respiratory tract, skin, central nervous system (CNS), eye, lens or cornea.

Section 12. Ecological information

Waste disposal: The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Consult your local or regional authorities.

Section 15. Regulatory information

HCS Classification: Flammable liquid

U.S. Federal regulations
- SARA 302/304/311/312 extremely hazardous substances: No products were found.
- SARA 302/304 emergency planning and notification: No products were found.
- TSCA 8(b) inventory: All components are listed or exempted.

California Prop. 65: No products were found.

Notice to reader
The above information is believed to be correct with respect to the formula used to manufacture the product in the country of origin. As data, standards, and regulations change, and conditions of use and handling are beyond our control, NO WARRANTY, EXPRESS OR IMPLIED, IS MADE AS TO THE COMPLETENESS OR CONTINUING ACCURACY OF THIS INFORMATION.
Material Safety Data Sheet
BRILLIANT STAINLESS STEEL POLISH

Section 1. Chemical product and company identification
Trade name: BRILLIANT STAINLESS STEEL POLISH
Product use: Cleaning product
Supplier: SSDC
Code: 924886-02
Date of issue: 18-August-2008

Section 2. Composition, information on ingredients
Name: distillates (petroleum), solvent-dewaxed heavy paraffinic
CAS number: 64742-65-0
% by weight: 20 - 50

Section 3. Hazards identification
Physical state: Liquid. [Emulsion.]
Emergency overview: CAUTION!
MAY CAUSE EYE IRRITATION.

Potential acute health effects
Eyes: Moderately irritating to eyes.
Skin: No known significant effects or critical hazards.
Inhalation: No known significant effects or critical hazards.
Ingestion: May be harmful if swallowed.

Section 4. First aid measures
Eye contact: In case of contact, immediately flush eyes with plenty of water. Remove contact lenses and flush again. Get medical attention if irritation persists.
Skin contact: In case of contact, immediately flush skin with plenty of water. Get medical attention if irritation develops.
Inhalation: If inhaled, remove to fresh air.
Ingestion: Do not induce vomiting. Never give anything by mouth to an unconscious person. If irritation persists, get medical attention.

Section 5. Fire fighting measures
Flash point: > 100°C
Hazardous thermal decomposition products: Decomposition products may include the following materials: carbon dioxide, carbon monoxide
Fire-fighting media and instructions: Use an extinguishing agent suitable for the surrounding fire. Dike area of fire to prevent runoff.
Special protective equipment for fire-fighters: In a fire or if heated, a pressure increase will occur and the container may burst. Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full-face piece operated in positive pressure mode.

Section 6. Accidental release measures
Personal precautions: No special measures required.
Environmental precautions: Avoid dispersal of spilled material and runoff and contact with soil, waterways, and sewers.
Methods for cleaning up: For small spills, add absorbent (soil may be used in the absence of other suitable materials), scoop up material and place in a sealable, liquid-proof container for disposal. For large spills, dike spilled material or otherwise contain it to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal.

Section 7. Handling and storage
Handling: Avoid contact with eyes. Wash thoroughly after handling.
Storage: Keep out of reach of children. Keep container in a cool, well-ventilated area. Store between the following temperatures: 0 and 50°C

Section 8. Exposure controls/personal protection
Engineering measures: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
Personal protection:
Eyes: No protective equipment is needed under normal use conditions.
Hands: No protective equipment is needed under normal use conditions.
Skin: No protective equipment is needed under normal use conditions.
Respiratory: A respirator is not needed under normal and intended conditions of product use.
Consult local authorities for acceptable exposure limits.

Section 9. Physical and chemical properties
Physical state: Liquid. [Emulsion.]
Color: White. [Light]
Odor: Odorless.
pH: 9.2 to 9.6 [Conc. (% w/w): 100%]
Relative density: 0.954 to 0.964
Solubility: Easily soluble in the following materials: cold water and hot water.

Section 10. Stability and reactivity
Stability: The product is stable. Under normal conditions of storage and use, hazardous polymerization will not occur.
Hazardous decomposition products: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
Hazardous polymerization: Under normal conditions of storage and use, hazardous polymerization will not occur.

Section 11. Toxicological information
Potential acute health effects
Eyes: Moderately irritating to eyes.
Skin: No known significant effects or critical hazards.
Inhalation: No known significant effects or critical hazards.
Ingestion: May be harmful if swallowed.
Section 12. Ecological information

The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Section 13. Disposal considerations

Waste disposal: The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Consult your local or regional authorities.

Section 14. Transport information

See shipping documents for specific transportation information.

Section 15. Regulatory information

HCS Classification: Irritating material
U.S. Federal regulations: SARA 302/304/311/312 extremely hazardous substances: No products were found.
SARA 302/304 emergency planning and notification: No products were found.
TSCA 8(b) inventory: All components are listed or exempted.
California Prop. 65: No products were found.

Section 16. Other information

Hazardous Material Information System (U.S.A.): Health 1, Flammability 0, Physical hazards 0

Date of issue: 18-August-2008.
Responsible name: Regulatory Affairs
Date of previous issue: 14-August-2008.

Notice to reader

Section 3. Hazards identification

Physical state: Liquid.

Emergency overview:

MAY CAUSE EYE IRRITATION.
Repeated or prolonged contact with irritants may cause dermatitis.
Avoid contact with eyes. Avoid breathing vapor or mist. Keep container closed. Use only with adequate ventilation. Wash thoroughly after handling.

Potential acute health effects:

- Eyes: Moderately irritating to eyes.
- Skin: No known significant effects or critical hazards.
- Inhalation: No known significant effects or critical hazards.
- Ingestion: No known significant effects or critical hazards.

See toxicological information (section 11)

Section 4. First aid measures

Eye contact: In case of contact, immediately flush eyes with cool running water. Remove contact lenses and continue flushing with plenty of water for at least 15 minutes. Get medical attention if irritation persists.

Skin contact: Flush contaminated skin with plenty of water. Wash clothing before reuse.

Inhalation: Do not induce vomiting. Never give anything by mouth to an unconscious person. If irritation persists, get medical attention.

Section 5. Fire fighting measures

Flash point: > 100°C

Fire-fighting media and instructions: Use an extinguishing agent suitable for the surrounding fire.

Special protective equipment for fire-fighters: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions: No special measures required.

Environmental precautions: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods for cleaning up: For small spills, add absorbent (soil may be used in the absence of other suitable materials), scoop up material and place in a sealable, liquid-proof container for disposal.

Section 7. Handling and storage

Handling: Avoid contact with eyes. Do not breathe the vapor or mist. Keep container closed. Use only with adequate ventilation. Wash thoroughly after handling.

Storage: Keep out of the reach of children. Keep container tightly closed. Keep container in a cool, well-ventilated area.

Section 8. Exposure controls, personal protection

Personal protection:

- Eyes: No special protection is required.
- Hands: No protective equipment is needed under normal use conditions.
- Skin: No protective equipment is needed under normal use conditions.
- Respiratory: Avoid breathing vapors, spray or mists.

Consult local authorities for acceptable exposure limits.

Section 9. Physical and chemical properties

Physical state: Liquid.

Color: Colorless.

Odor: Pine oil

pH: 11.8 to 13

Specific gravity: 1.006 to 1.026

Solubility: Easily soluble in cold water.

Section 10. Stability and reactivity

Stability: The product is stable.

Section 11. Toxicological information

Potential acute health effects:

- Eyes: Moderately irritating to eyes.
- Skin: No known significant effects or critical hazards.
- Inhalation: No known significant effects or critical hazards.
- Ingestion: No known significant effects or critical hazards.

Section 12. Ecological information

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional/local authority requirements.

Consult your local or regional authorities.

Section 13. Disposal considerations

Waste disposal: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional/local authority requirements.

Material Safety Data Sheet
DEGREE GRILL CLEANER

Section 1. Chemical product and company identification
Trade name: DEGREE GRILL CLEANER
Product use: Grill Cleaner
Supplier: SSDC
4050 Corporate Dr., #100 Grapevine, TX 76051
1-800-532-7732 (Customer Service)
Code: 912330
Date of issue: 29-April-2008

Section 2. Composition, information on ingredients
Name | CAS number | % by weight
--- | --- | ---
glycerin | 56-81-5 | >50
potassium carbonate | 584-08-7 | 5 - 20

Section 3. Hazards identification
Physical state: Liquid. [Liquid.]
Emergency overview: CAUTION!
MAY CAUSE EYE AND SKIN IRRITATION.

Potential acute health effects:
- Eyes: Moderately irritating to eyes.
- Skin: Moderately irritating to the skin.
- Inhalation: No known significant effects or critical hazards.
- Ingestion: No known significant effects or critical hazards.

See toxicological information (section 11)

Section 4. First aid measures
Eye contact: In case of contact, immediately flush eyes with plenty of water. Remove contact lenses and flush again. Get medical attention if irritation persists.
Skin contact: In case of contact, immediately flush skin with plenty of water. Get medical attention if irritation persists.
Inhalation: If inhaled, remove to fresh air.
Ingestion: Do not induce vomiting. Never give anything by mouth to an unconscious person. If irritation persists, get medical attention.

Section 5. Fire fighting measures
Flash point: > 100°C
Hazardous thermal decomposition products: Decomposition products may include the following materials:
carbon oxides
metal oxide/oxides
Fire-fighting media and instructions: Use an extinguishing agent suitable for the surrounding fire.

Special protective equipment for fire-fighters

Section 6. Accidental release measures
Personal precautions: No special measures required.
Environmental precautions: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
Methods for cleaning up: For small spills, add absorbent (soil may be used in the absence of other suitable materials). Scoop up material and place in a sealable, liquid-proof container for disposal. For large spills, dike spilled material or otherwise contain it to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal.

Section 7. Handling and storage
Handling: Avoid contact with eyes, skin and clothing. Wash thoroughly after handling.
Storage: Keep out of reach of children. Keep container in a cool, well-ventilated area. Keep container tightly closed.

Store between the following temperatures: 0 and 50°C

Section 8. Exposure controls, personal protection
Personal protection:
- Eyes: No special protection is required.
- Hands: No special protection is required.
- Skin: No protective equipment is needed under normal use conditions.
- Respiratory: A respirator is not needed under normal and intended conditions of product use.

Name | Exposure limits | Personal protection
--- | --- | ---
glycerin | ACGIH TLV (United States, 1/2007).
 | TWA: 10 mg/m³ 8 hour(s). Form: Mist
 | OSHA PEL (United States, 11/2006).
 | TWA: 5 mg/m³ 8 hour(s). Form: Respirable fraction
 | TWA: 15 mg/m³ 8 hour(s). Form: Total dust

Section 9. Physical and chemical properties
Physical state: Liquid. [Liquid.]
Odor: Faint odor.
Color: Orange.
pH: 11.5 to 12.5 [Conc. (% w/w): 100%]
Boiling/condensation point: >100°C (>212°F)
Specific gravity: 1.248 to 1.268
Viscosity: Dynamic: 35 cP
Solubility: Easily soluble in cold water, hot water.

Section 10. Stability and reactivity
Stability: The product is stable. Under normal conditions of storage and use, hazardous polymerization will not occur.
Reactivity: Extremely reactive or incompatible with acids.
Hazardous decomposition products: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
Section 11. Toxicological information

Potential acute health effects
- Eyes: Moderately irritating to eyes.
- Skin: Moderately irritating to the skin.
- Inhalation: No known significant effects or critical hazards.
- Ingestion: No known significant effects or critical hazards.

Potential chronic health effects

Section 12. Ecological information

The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional/local authority requirements.

Section 13. Disposal considerations

Waste disposal
The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional/local authority requirements.

Consult your local or regional authorities.

Material Safety Data Sheet

INSIDE OUT HEAVY DUTY DEGREASER

Section 1. Chemical product and company identification

Trade name : INSIDE OUT HEAVY DUTY DEGREASER
Product use : Degreaser
Supplier : SSDC
4050 Corporate Dr., #100
Grapevine, TX 76051
1-800-532-7732 (Customer Service)
Code : 912760-01
Date of issue : 11-November-2008

Section 2. Composition, information on ingredients

Name | CAS number | % by weight
---|---|---
sodium carbonate | 497-19-8 | 5 - 20
xylenesulfonic acid, sodium salt | 1300-72-7 | 5 - 20
acetic acid, (ethylenedinitrilo)tetra-, tetrasodium salt | 64-02-8 | 5 - 20
alcohols, c10-14, ethoxylated | 66455-15-0 | 1 - 5

Section 3. Hazards identification

Physical state : Liquid. [Liquid.]
Emergency overview : CAUTION!
MAY CAUSE EYE IRRITATION.
Avoid contact with eyes. Wash thoroughly after handling.

Potential acute health effects

Eyes : Moderately irritating to eyes.
Skin : No known significant effects or critical hazards.
Inhalation : No known significant effects or critical hazards.
Ingestion : No known significant effects or critical hazards.
See toxicological information (section 11)

Section 4. First aid measures

Eye contact : In case of contact, immediately flush eyes with plenty of water. Remove contact lenses and flush again. Get medical attention if irritation persists.
Skin contact : In case of contact, immediately flush skin with plenty of water. Wash clothing before reuse.
Inhalation : If inhaled, remove to fresh air.
Ingestion : Do not induce vomiting. Never give anything by mouth to an unconscious person. If irritation persists, get medical attention.

Section 5. Fire fighting measures

Flash point : > 100°C
Hazardous thermal decomposition products : Decomposition products may include the following materials:
carbon dioxide
carbon monoxide
nitrogen oxides
sulfur oxides
metal oxide/oxides
Fire-fighting media and instructions : Use an extinguishing agent suitable for the surrounding fire.
Dike area of fire to prevent runoff.

Section 6. Accidental release measures

Special protective equipment for fire-fighters : In a fire or if heated, a pressure increase will occur and the container may burst.
Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 7. Handling and storage

Handling : Avoid contact with eyes. Wash thoroughly after handling.
Storage : Keep out of reach of children. Keep container in a cool, well-ventilated area. Keep container tightly closed.
Store between the following temperatures: 0 and 50°C

Section 8. Exposure controls/personal protection

Personal protection : Use suitable protective equipment (section 8). Do not allow to enter drains or watercourses.
Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
Methods for cleaning up : For small spills, add absorbent (soil may be used in the absence of other suitable materials), scoop up material and place in an appropriate container for disposal. For large spills, dike spilled material or otherwise contain it to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal.

Section 9. Physical and chemical properties

Physical state : Liquid. [Liquid.]
Color : Violet. [Dark]
Odor : Faint odor.
pH : 11.2 to 13.2 [Conc. (% w/w): 100%]
Relative density : 1.123 to 1.163
Solubility : Easily soluble in the following materials: cold water and hot water.

Section 10. Stability and reactivity

Stability : The product is stable. Under normal conditions of storage and use, hazardous polymerization will not occur.
Reactivity : Reactive or incompatible with the following materials: acids.
Hazardous decomposition products : Slightly reactive or incompatible with the following materials: metals.
Hazardous polymerization : Under normal conditions of storage and use, hazardous polymerization should not be produced.

CAUTION!
MAY CAUSE EYE AND SKIN IRRITATION.

Avoid contact with eyes, skin and clothing. Wash thoroughly after handling.

Section 4. First aid measures

Eye contact: In case of contact with eyes, rinse immediately with plenty of water. Get medical attention if irritation occurs.

Skin contact: In case of contact, immediately flush skin with plenty of water. Get medical attention if irritation persists.

Inhalation: If inhaled, remove to fresh air. Never give anything by mouth to an unconscious person. If irritation persists, get medical attention.

Section 5. Fire fighting measures

Flash point: > 100°C

Hazardous thermal decomposition products: Decomposition products may include the following materials:
- carbon dioxide
- carbon monoxide
- sulfur oxides
- metal oxide/oxides

Fire-fighting media and instructions: Use an extinguishing agent suitable for the surrounding fire.

Section 6. Accidental release measures

Handling: Avoid contact with eyes, skin and clothing. Wash thoroughly after handling.

Storage: Keep out of reach of children. Keep container in a cool, well-ventilated area. Keep container tightly closed.

Store between the following temperatures: 0 and 50°C

Section 7. Handling and storage

Handling: No special measures required.

Storage: For small spills, add absorbent (soil may be used in the absence of other suitable materials), scoop up material and place in a sealable, liquid-proof container for disposal. Place spilled material in an appropriate container for disposal.

Section 8. Exposure controls/personal protection

Engineering measures: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Personal protection:
- Eyes: No special protection is required.
- Hands: No special protection is required.
- Respiratory: A respirator is not needed under normal and intended conditions of product use.

Dike area of fire to prevent runoff.

In a fire or if heated, a pressure increase will occur and the container may burst.

Special protective equipment for fire-fighters: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 9. Physical and chemical properties

Physical state: Liquid.
Color: Violet.
Odor: citrus
pH: 12 to 14 [Conc. (% w/w): 100%]
Relative density: 1.014 to 1.034
Solubility: Easily soluble in the following materials: cold water and hot water.
Section 10. Stability and reactivity

Stability: The product is stable. Under normal conditions of storage and use, hazardous polymerization will not occur.

Reactivity: Highly reactive or incompatible with the following materials: acids.

Hazardous decomposition: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Hazardous polymerization: Under normal conditions of storage and use, hazardous polymerization will not occur.

Section 11. Toxictological information

Potential acute health effects:
- Eyes: Moderately irritating to eyes.
- Skin: Moderately irritating to the skin.
- Inhalation: No known significant effects or critical hazards.
- Ingestion: No known significant effects or critical hazards.

Potential chronic health effects:
- Target organs: No known significant effects or critical hazards.

Section 12. Ecological information

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Section 13. Disposal considerations

Consult your local or regional authorities.

Section 14. Transport information

Not regulated.

See shipping documents for specific transportation information.

Section 15. Regulatory information

Emergency overview: MAY CAUSE EYE IRRITATION.

Potential acute health effects:
- Eyes: Slightly irritating to the eyes.
- Skin: No known significant effects or critical hazards.
- Inhalation: No known significant effects or critical hazards.
- Ingestion: No known significant effects or critical hazards.

See toxicological information (section 11)

Section 4. First aid measures
Eye contact: In case of contact, immediately flush eyes with plenty of water. Remove contact lenses and flush again. Get medical attention if irritation persists.
Skin contact: Not applicable
Inhalation: If inhaled, remove to fresh air.
Ingestion: Do not induce vomiting. Never give anything by mouth to an unconscious person. If irritation persists, get medical attention.

Section 5. Fire fighting measures
Flash point: >93.333 °C (Closed cup)
Hazardous thermal decomposition products: Decomposition products may include the following materials:
- carbon dioxide
- carbon monoxide
- nitrogen oxides
- sulfur oxides
- metal oxide/oxides

Fire-fighting media and instructions: Use an extinguishing agent suitable for the surrounding fire.
Dike area of fire to prevent runoff.
In a fire or if heated, a pressure increase will occur and the container may burst.

Section 6. Accidental release measures
Personal protective equipment for fire-fighters: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Environmental precautions: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
Methods for cleaning up: For small spills, add absorbent (soil may be used in the absence of other suitable materials), scoop up material and place in a sealable, liquid-proof container for disposal. For large spills, dike spilled material or otherwise contain it to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal.

Section 7. Handling and storage
Handling: Avoid contact with eyes.
Storage: Keep out of reach of children. Keep container in a cool, well-ventilated area. Keep container tightly closed. Store between the following temperatures: 0 and 50°C

Section 8. Exposure controls/personal protection
Engineering measures: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
Personal protection:
- Eyes: No special protection is required.
- Respiratory: A respirator is not needed under normal and intended conditions of product use.

Exposure limits:
- 2-methylpentane-2,4-diol: ACGIH TLV (United States, 1/2007).
  - C: 121 mg/m³
  - CEIL: 125 mg/m³
- acetic acid, (ethylenedinitrilo)tetra-, tetrasodium salt: NIOSH REL (United States, 12/2001).
  - CEIL: 25 ppm

Section 9. Physical and chemical properties
Physical state: Liquid. [Liquid.]
Color: Yellow.
Odor: Fragrance-like.
pH: 8.5 to 9.1 [Conc. (% w/w): 100%]
Relative density: 1.03 to 1.06
Solubility: Easily soluble in the following materials: cold water and hot water.

Section 10. Stability and reactivity
Stability: The product is stable. Under normal conditions of storage and use, hazardous polymerization will not occur.
Hazardous decomposition products: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
Hazardous polymerization: Under normal conditions of storage and use, hazardous polymerization will not occur.
Section 11. Toxicological information

Potential acute health effects

Eyes: Slightly irritating to the eyes.
Skin: No known significant effects or critical hazards.
Inhalation: No known significant effects or critical hazards.
Ingestion: No known significant effects or critical hazards.

Potential chronic health effects

Target organs: Contains material which may cause damage to the following organs: mucous membranes, upper respiratory tract, skin, central nervous system (CNS), eye, lens or cornea.

Target organs:

Section 12. Ecological information

The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Consult your local or regional authorities.

Section 13. Disposal considerations

Waste disposal: The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

See shipping documents for specific transportation information.

As data, standards, and regulations change, and conditions of use and handling are beyond our control, NO WARRANTY, EXPRESS OR IMPLIED, IS MADE AS TO THE COMPLETENESS OR CONTINUING ACCURACY OF THIS INFORMATION.

Certification

Responsible name: Regulatory Affairs

Date of issue: 01-August-2008.
Date of previous validation: No previous validation.

Notice to reader

The above information is believed to be correct with respect to the formula used to manufacture the product in the country of origin. As data, standards, and regulations change, and conditions of use and handling are beyond our control, NO WARRANTY, EXPRESS OR IMPLIED, IS MADE AS TO THE COMPLETENESS OR CONTINUING ACCURACY OF THIS INFORMATION.
Section 1. Chemical product and company identification

Trade name : MULTISHEEN READY-TO-USE (RTU) GLASS AND MULTISURFACE CLEANER
Product use : Glass Cleaner
Supplier : SSDC
4050 Corporate Dr., #100
Grapevine, TX 76051
1-800-532-7732 (Customer Service)
Code : 912366
Date of issue : 02-October-2008
EMERGENCY HEALTH INFORMATION:
1-800-391-1504

Section 2. Composition, information on ingredients

To the present knowledge of the supplier, this product does not contain any hazardous ingredients in quantities requiring reporting, according to local regulations.

Section 3. Hazards identification

Physical state : Liquid [Liquid]
Emergency overview : CAUTION!
MAY CAUSE EYE IRRITATION.

Avoid contact with eyes. Wash thoroughly after handling.

Potential acute health effects

Eyes : Slightly irritating to the eyes.
Skin : No known significant effects or critical hazards.
Inhalation : No known significant effects or critical hazards.
Ingestion : No known significant effects or critical hazards.

See toxicological information (section 11)

Section 4. First aid measures

Eye contact : In case of contact, immediately flush eyes with plenty of water. Remove contact lenses and flush again. Get medical attention if irritation persists.

Skin contact : In case of contact, immediately flush skin with plenty of water. Wash clothing before reuse.

Inhalation : If inhaled, remove to fresh air.
Ingestion : Do not induce vomiting. Never give anything by mouth to an unconscious person. If irritation persists, get medical attention.

Section 5. Fire fighting measures

Flash point : >93.3 °C (Closed cup)
Hazardous thermal decomposition products : No specific data.
Fire-fighting media and instructions : Use an extinguishing agent suitable for the surrounding fire.

Dike area of fire to prevent runoff.
In a fire or if heated, a pressure increase will occur and the container may burst.

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions : No special measures required.

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Methods for cleaning up : For small spills, add absorbent (soil may be used in the absence of other suitable materials), scoop up material and place in a sealable, liquid-proof container for disposal. For large spills, dike spilled material or otherwise contain it to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal.

Section 7. Handling and storage

Handling : Avoid contact with eyes. Wash thoroughly after handling.
Storage : Keep out of reach of children. Keep container in a cool, well-ventilated area. Keep container tightly closed.
Store between the following temperatures: 0 and 50°C

Section 8. Exposure controls/personal protection

Engineering measures : Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Personal protection :

Eyes : No protective equipment is needed under normal use conditions.
Hands : No protective equipment is needed under normal use conditions.
Skin : No protective equipment is needed under normal use conditions.
Respiratory : A respirator is not needed under normal and intended conditions of product use.

Consult local authorities for acceptable exposure limits.

Section 9. Physical and chemical properties

Physical state : Liquid [Liquid]
Color : Blue [Light]
Odor : Floral
pH : 10 to 11 [Conc. (% w/w): 100%]
Relative density : 0.99 to 1.01
Solubility : Easily soluble in the following materials: cold water and hot water.

Section 10. Stability and reactivity

Stability : The product is stable. Under normal conditions of storage and use, hazardous polymerization will not occur.

Hazardous decomposition products : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Hazardous polymerization : Under normal conditions of storage and use, hazardous polymerization will not occur.

Section 11. Toxicological information

Potential acute health effects

Eyes : Slightly irritating to the eyes.
Skin : No known significant effects or critical hazards.
Inhalation : No known significant effects or critical hazards.
Ingestion : No known significant effects or critical hazards.
Section 12. Ecological information

Section 13. Disposal considerations

Waste disposal:
Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional/local authority requirements.

Consult your local or regional authorities.

Section 14. Transport information

Certain shipping modes or package sizes may have exceptions from the transport regulations. The classification provided may not reflect those exceptions and may not apply to all shipping modes or package sizes.

UN Classification: Not regulated.
See shipping documents for specific transportation information.

Section 15. Regulatory information

HCS classification: Irritating material
U.S. Federal regulations:
SARA 302/304/311/312 extremely hazardous substances: No products were found.
SARA 302/304 emergency planning and notification: No products were found.
TSCA 8(b) inventory: All components are listed or exempted.

Section 3. Hazards identification

Physical state: Liquid.
Emergency overview: CAUTION! MAY CAUSE EYE AND SKIN IRRITATION.

Potential acute health effects
- **Eyes**: Moderately irritating to eyes.
- **Skin**: Moderately irritating to the skin.
- **Inhalation**: No known significant effects or critical hazards.
- **Ingestion**: No known significant effects or critical hazards.

See toxicological information (section 11)

Section 4. First aid measures

**Eye contact**: In case of contact, immediately flush eyes with plenty of water. Remove contact lenses and flush again. Get medical attention if irritation persists.

**Skin contact**: In case of contact, immediately flush skin with plenty of water. Get medical attention if irritation persists.

**Inhalation**: If inhaled, remove to fresh air.

**Ingestion**: If not indued vomiting. Never give anything by mouth to an unconscious person. If irritation persists, get medical attention.

Section 5. Fire fighting measures

**Flash point**: > 100°C
**Hazardous thermal decomposition products**: Decomposition products may include the following materials: phosphorus oxides, metal oxides/oxides
**Fire-fighting media and instructions**: Use an extinguishing agent suitable for the surrounding fire. Dike area of fire to prevent runoff. In a fire or if heated, a pressure increase will occur and the container may burst.

Section 6. Accidental release measures

**Special protective equipment for fire-fighters**: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

**Personal precautions**: No special measures required.
**Environmental precautions**: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
**Methods for cleaning up**: For small spills, add absorbent (soil may be used in the absence of other suitable materials), scoop up material and place in a sealable, liquid-proof container for disposal. For large spills, dike spilled material or otherwise contain it to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal.

Section 7. Handling and storage

**Handling**: Avoid contact with eyes, skin and clothing. Wash thoroughly after handling.
**Storage**: Keep out of reach of children. Keep container in a cool, well-ventilated area. Keep container tightly closed. Store between the following temperatures: 0 and 50°C

Section 8. Exposure controls/personal protection

**Engineering measures**: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
**Personal protection**: No special protection is required.

Section 9. Physical and chemical properties

**Physical state**: Liquid.
**Color**: Violet. [Light]
**Odor**: Odorless.
**pH**: 12.5 to 13.5 [Conc. (% w/w): 100%]
**Relative density**: 1.1 to 1.2
**Solubility**: Easily soluble in the following materials: cold water and hot water.

Section 10. Stability and reactivity

**Stability**: The product is stable. Under normal conditions of storage and use, hazardous polymerization will not occur.
**Hazardous decomposition products**: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
**Hazardous polymerization**: Under normal conditions of storage and use, hazardous polymerization will not occur.
Section 11. Toxicological information

Potential acute health effects

- Eyes: Moderately irritating to eyes.
- Skin: Moderately irritating to the skin.
- Inhalation: No known significant effects or critical hazards.
- Ingestion: No known significant effects or critical hazards.

Potential chronic health effects

- Target organs: Contains material which may cause damage to the following organs: lungs, upper respiratory tract.

Section 12. Ecological information

Section 13. Disposal considerations

Waste disposal: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional/local authority requirements.

Consult your local or regional authorities.

Section 14. Transport information

Certain shipping modes or package sizes may have exceptions from the transport regulations. The classification provided may not reflect those exceptions and may not apply to all shipping modes or package sizes.

UN Classification
- UN number: 1760
- Proper shipping name: CORROSIVE LIQUID, N.O.S. (sodium hydroxide)
- Class: 8
- Packing group: III

See shipping documents for specific transportation information.

Section 15. Regulatory information

HCS Classification: Irritating material

- U.S. Federal regulations: SARA 302/304/311/312 extremely hazardous substances: No products were found.
- SARA 302/304 emergency planning and notification: No products were found.
- TSCA 8(b) inventory: All components are listed or exempted.
- California Prop. 65: No products were found.

Section 16. Other information

Hazardous Material Information System (U.S.A.)
- Health: 1
- Flammability: 0
- Physical hazards: 0

Date of issue: 10-March-2009.
Responsible name: Regulatory Affairs
Date of previous issue: 18-February-2009.

The above information is believed to be correct with respect to the formula used to manufacture the product in the country of origin. As data, standards, and regulations change, and conditions of use and handling are beyond our control, NO WARRANTY, EXPRESS OR IMPLIED, IS MADE AS TO THE COMPLETENESS OR CONTINUING ACCURACY OF THIS INFORMATION.
Material Safety Data Sheet
SANI QUAD FOOD SERVICE SANITIZER

Section 1. Chemical product and company identification
Trade name: SANI QUAD FOOD SERVICE SANITIZER
Product use: Sanitizer - Food contact surface
Supplier: Ecolab Inc.
Code: 912359-01
Date of issue: 02-March-2010
EPA Registration No.: 6836-70-1677

Section 2. Hazards identification
Physical state: Liquid. (Liquid.)
Emergency overview: CAUSES DIGESTIVE TRACT, EYE AND SKIN BURNS.
MAY CAUSE RESPIRATORY TRACT IRRITATION. HARMFUL IF ABSORBED THROUGH SKIN OR IF SWALLOWED.
Do not ingest. Do not get in eyes, on skin or on clothing. Avoid breathing vapors, spray or mists. Keep container closed. Use only with adequate ventilation. Wash thoroughly after handling.

Potential acute health effects
Eyes: Corrosive to eyes.
Skin: Corrosive to the skin.
Inhalation: Moderately irritating to the respiratory system.
Ingestion: Causes burns to mouth, throat and stomach.
See toxicological information (section 11)

Section 3. Composition/information on ingredients
Name: DICAPRYL/DICAPRYLYL DIMONIUM CHLORIDE
CAS number: 68424-95-3
% by weight: 1 - 5

Section 4. First aid measures
Eye contact: In case of contact, immediately flush eyes with cool running water. Remove contact lenses and continue flushing with plenty of water for at least 15 minutes. Get medical attention immediately.

Skin contact: In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention immediately. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Inhalation: If inhaled, remove to fresh air.
Ingestion: If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting. Never give anything by mouth to an unconscious person. Get medical attention immediately.

Section 5. Fire-fighting measures
Flash point: 537.222 °C (Closed cup)
Hazardous thermal decomposition products: Decomposition products may include the following materials: carbon dioxide, carbon monoxide, metal oxide/oxides
Fire-fighting media and instructions: Use an extinguishing agent suitable for the surrounding fire.
Special protective equipment for fire-fighters: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures
Personal precautions: Immediately contact emergency personnel. Stop leak if without risk. Use suitable protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
Environmental precautions: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
Methods for cleaning up: If emergency personnel are unavailable, contain spilled material. For small spills, add absorbent (soil may be used in the absence of other suitable materials), scoop up material and place in a sealable, liquid-proof container for disposal. For large spills, dike spilled material or otherwise contain it to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal.

Section 7. Handling and storage
Handling: Do not ingest. Do not get in eyes, on skin, or on clothing. Avoid breathing vapors, spray or mists. Keep container closed. Use only with adequate ventilation. Wash thoroughly after handling.
Storage: Keep out of reach of children. Keep container in a cool, well-ventilated area. Keep container tightly closed. Do not store above the following temperature: 40°C

Section 8. Exposure controls/personal protection
Engineering measures: Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. Provide suitable facilities for quick drenching or flushing of the eyes and body in case of contact or splash hazard.
Personal protection:

Section 3. Composition/information on ingredients

Section 10. Stability and reactivity

**Stability**: The product is stable. Under normal conditions of storage and use, hazardous polymerization will not occur.

**Reactivity**: Highly reactive or incompatible with the following materials: acids and alkalis.

**Hazardous decomposition products**: Should not be produced.

**Hazardous polymerization**: Under normal conditions of storage and use, hazardous polymerization will not occur.

Section 11. Toxicological information

**Potential acute health effects**

- **Eyes**: Corrosive to eyes.
- **Skin**: Corrosive to the skin.
- **Inhalation**: Moderately irritating to the respiratory system.
- **Ingestion**: Causes burns to mouth, throat and stomach.

Section 12. Ecological information

**Ecotoxicity data**: Not reported

Section 13. Disposal considerations

**Waste disposal**: The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Consult your local or regional authorities.

Section 14. Transport information

**Certain shipping modes or package sizes may have exceptions from the transport regulations. The classification provided may not reflect those exceptions and may not apply to all shipping modes or package sizes.**

**UN Classification**: Not regulated.

See shipping documents for specific transportation information.

Section 15. Regulatory information

**HCS Classification**: Corrosive material

**U.S. Federal regulations**

- **TSCA 8(b) inventory**: All components are listed or exempted.
- **EPA Registration No.**: 6836-70-1677

Section 3. Hazards identification

Physical state: Liquid.
Emergency overview: May cause eye and skin irritation.

Potential acute health effects:
- Eyes: Irritating to eyes.
- Skin: Moderately irritating to the skin.
- Inhalation: No known significant effects or critical hazards.
- Ingestion: No known significant effects or critical hazards.

Section 4. First aid measures

Eye contact: In case of contact with eyes, rinse immediately with plenty of water. Get medical attention if irritation occurs.
Skin contact: In case of contact, immediately flush skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if irritation persists.
Inhalation: If inhaled, remove to fresh air.
Ingestion: Do not induce vomiting. Never give anything by mouth to an unconscious person. If irritation persists, get medical attention.

Section 5. Fire fighting measures

Flash point: > 100°C
Hazardous decomposition products: Decomposition products may include the following materials:
- carbon oxides
- halogenated compounds
- metal oxides/oxides

Fire-fighting media and instructions: Use an extinguishing agent suitable for the surrounding fire.

Section 6. Accidental release measures

Handling: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
Storage: Keep out of reach of children. Keep container in a cool, well-ventilated area. Keep container tightly closed.

Section 7. Handling and storage

Handling: Avoid contact with eyes, skin and clothing. Wash thoroughly after handling.

Section 8. Exposure controls, personal protection

Engineering measures: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
Personal protection:
- Eyes: No special protection is required.
- Hands: No special protection is required.
- Respiratory: A respirator is not needed under normal and intended conditions of product use.

Section 9. Physical and chemical properties

Physical state: Liquid.
Color: Blue.
Odor: Lemon-like.
pH: 7.5
Specific gravity: 1.04
Solubility: Easily soluble in cold water, hot water.

Section 10. Stability and reactivity

Stability: The product is stable. Under normal conditions of storage and use, hazardous polymerization will not occur.
Hazardous decomposition products: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
Section 11. Toxicological information

Potential acute health effects

- Eyes: Irritating to eyes.
- Skin: Moderately irritating to the skin.
- Inhalation: No known significant effects or critical hazards.
- Ingestion: No known significant effects or critical hazards.

Potential chronic health effects

- Target organs: No known significant effects or critical hazards.

Section 12. Ecological information

- The generation of waste should be avoided or minimized wherever possible.
- Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
- Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Consult your local or regional authorities.

Section 13. Disposal considerations

Waste disposal

- The generation of waste should be avoided or minimized wherever possible.
- Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
- Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Consult your local or regional authorities.

Section 1. Chemical product and company identification

Trade name: SUPER SAN FOOD SERVICE SANITIZER
Product use: Sanitizer - Food contact surface
Supplier: Ecolab Inc.
370 N. Wabasha Street
St. Paul, MN 55102
Code: 911285-02
Date of issue: 02-March-2010
EPA Registration No.: 6836-305-1677

Section 2. Hazards identification

Physical state: Liquid. [Liquid.]
Emergency overview: DANGER!
CAUSES DIGESTIVE TRACT, EYE AND SKIN BURNS.
HARMFUL IF INHALED OR SWALLOWED.
MAY BE HARMFUL IF ABSORBED THROUGH SKIN.
Do not ingest. Do not get in eyes, on skin or on clothing. Avoid breathing vapors, spray or mists. Keep container closed. Use only with adequate ventilation. Wash thoroughly after handling.

Section 3. Composition/information on ingredients

<table>
<thead>
<tr>

<td>1 - 5</td>
</tr>
</tbody>
</table>

Section 4. First aid measures

Eye contact: In case of contact, immediately flush eyes with cool running water. Remove contact lenses and continue flushing with plenty of water for at least 15 minutes. Get medical attention immediately.
Skin contact: In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention immediately. Clean shoes thoroughly before reuse. Clean skin thoroughly before reuse.
Inhalation: If inhaled, remove to fresh air. If exposed person is not breathing, give artificial respiration or oxygen applied by trained personnel. Get medical attention immediately.
Ingestion: If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting. Never give anything by mouth to an unconscious person. Get medical attention immediately.

Section 5. Fire-fighting measures

Flash point: 93.3333 °C (Closed cup)
Hazardous thermal decomposition products: Decomposition products may include the following materials:
carbon dioxide
carbon monoxide
metal oxides/oxides
Fire-fighting media and instructions: Use an extinguishing agent suitable for the surrounding fire.
Special protective equipment for fire-fighters: Dike area of fire to prevent runoff. In a fire or if heated, a pressure increase will occur and the container may burst.

Section 6. Accidental release measures

Immediately contact emergency personnel. Stop leak if without risk. Use suitable protective equipment. Keep unnecessary personnel away. Do not touch or walk through spilled material.
If emergency personnel are unavailable, contain spilled material. For small spills, add absorbent (soil may be used in the absence of other suitable materials), scoop up material and place in a sealable, liquid-proof container for disposal. For large spills, dike spilled material or otherwise contain it to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal.

Section 7. Handling and storage

Handling: Do not ingest. Do not get in eyes, on skin or on clothing. Keep container closed. Use only with adequate ventilation. Do not breathe vapor or mist. Wash thoroughly after handling.
Storage: Keep out of reach of children. Keep container in a cool, well-ventilated area. Keep container tightly closed. Store between the following temperatures: 0 and 50°C

Section 8. Exposure controls/personal protection

Engineering measures: Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. Provide suitable facilities for quick drenching or flushing of the eyes and body in case of contact or splash hazard.

Personal protection:

Eyes: Use chemical splash goggles. For continued or severe exposure wear a face shield over the goggles.
Hands: Use chemical-resistant, impervious gloves.
Skin: Use suitable protective equipment.
Respiratory: Avoid breathing vapor or spray.

Name: ALCOHOL
Exposure limits:
ACGIH TLV (United States, 1/2009):
STEL: 1000 ppm 15 minute(s).
OSHA PEL (United States, 1/2006):
TWA: 1900 mg/m³ 8 hour(s).
TWA: 1000 ppm 8 hour(s).
Section 9. Physical and chemical properties

Physical state: Liquid, [Liquid.]
Color: Red, [Light]
Odor: disinfectant
pH: 6 to 9 [Conc. (% w/w): 100%]
Boiling/condensation point: >100°C (>212°F)
Relative density: 0.99
Dispersibility: Easily dispersible in the following materials: cold water and hot water.
Solubility: Easily soluble in the following materials: cold water and hot water.

Section 10. Stability and reactivity

Stability: The product is stable. Under normal conditions of storage and use, hazardous polymerization will not occur.
Hazardous decomposition products: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
Hazardous polymerization: Under normal conditions of storage and use, hazardous polymerization will not occur.

Section 11. Toxicological information

Potential acute health effects
- Eyes: Corrosive to eyes.
- Skin: Corrosive to the skin. MAY BE HARMFUL IF ABSORBED THROUGH SKIN.
- Inhalation: HARMFUL IF INHALED.
- Ingestion: Harmful if swallowed. Causes burns to mouth, throat and stomach.

Potential chronic health effects

Other adverse effects

Target organs: Contains material which may cause damage to the following organs: upper respiratory tract, central nervous system (CNS).

Section 12. Ecological information

Ecotoxicity data: Not reported

Section 13. Disposal considerations

Waste disposal: The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Consult your local or regional authorities.

Section 14. Transport information

Certain shipping modes or package sizes may have exceptions from the transport regulations. The classification provided may not reflect those exceptions and may not apply to all shipping modes or package sizes.

UN Classification: Not regulated.
See shipping documents for specific transportation information.

Section 15. Regulatory information

HCS Classification: Corrosive material
U.S. Federal regulations
TSCA 8(b) inventory: All components are listed or exempted.
EPA Registration No.: 6836-305-1677
SARA 302/304/311/312 extremely hazardous substances: No products were found.
SARA 302/304 emergency planning and notification: No products were found.
California Prop. 65: No products were found.
Section 1. Chemical product and company identification

| Trade name | TRACK |
| Product use | CLEANING PRODUCTS |
| Supplier | SSDC |
| Code | 912024-01 |

CAUSES EYE IRRITATION.
MAY CAUSE SKIN IRRITATION.
Avoid contact with skin and clothing. Wash thoroughly after handling.

Section 3. Hazards identification

Physical state: Liquid.
Emergency overview: CAUTION!

Potential acute health effects

Eyes: Irritating to eyes.
Skin: Moderately irritating to the skin.
Inhalation: No known significant effects or critical hazards.
Ingestion: No known significant effects or critical hazards.

See toxicological information (section 11)

Section 4. First aid measures

Eye contact: In case of contact, immediately flush eyes with cool running water. Remove contact lenses and continue flushing with plenty of water for at least 15 minutes. Get medical attention.
Skin contact: Flush contaminated skin with plenty of water. Get medical attention if irritation persists. Wash clothing before reuse.
Inhalation: If inhaled, remove to fresh air.
Ingestion: Do not induce vomiting. Never give anything by mouth to an unconscious person. If irritation persists, get medical attention.

Section 5. Fire fighting measures

Flash point: > 100°C
Fire-fighting media and instructions: Use an extinguishing agent suitable for the surrounding fire.
Special protective equipment for fire-fighters: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions: No special measures required.
Environmental precautions: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods for cleaning up: For small spills, add absorbent (soil may be used in the absence of other suitable materials), scoop up material and place in a sealable, liquid-proof container for disposal.

Section 7. Handling and storage

Handling: Avoid contact with eyes, skin and clothing. Wash thoroughly after handling.
Storage: Keep out of the reach of children. Keep container tightly closed. Keep container in a cool, well-ventilated area.

Section 8. Exposure controls, personal protection

Personal protection:
- Eyes: No special protection is required.
- Hands: No special protection is required.
- Skin: No special equipment is needed under normal use conditions.
- Respiratory: A respirator is not needed under normal and intended conditions of product use.

Consult local authorities for acceptable exposure limits.

Section 9. Physical and chemical properties

Physical state: Liquid.
Color: Green.
Odor: Pleasant.
pH: 2 to 4
Specific gravity: 1.06 to 1.1
Solubility: Easily soluble in cold water.

Section 10. Stability and reactivity

Stability: The product is stable.

Section 11. Toxicological information

Potential chronic health effects:
Contains material which causes damage to the following organs: skin, eye, lens or cornea.

Section 12. Ecological information

Section 13. Disposal considerations

Waste disposal: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Consult your local or regional authorities.

Material Safety Data Sheet
TRACTION ADVANTAGE CONCENTRATED FLOOR CLEANER

Section 1. Chemical product and company identification

Trade name: TRACTION ADVANTAGE CONCENTRATED FLOOR CLEANER
Product use: Floor Cleaner
Supplier: SSDC Division
Kay Chemical Company
4050 Corporate Dr., #100
Grapevine, TX 76051
1-800-532-7732 (Customer Service)

Code: 913521-01
Date of issue: 11-January-2010

EMERGENCY HEALTH INFORMATION: 1-800-391-1504

Section 2. Hazards identification

Physical state: Liquid. [Liquid.]
Emergency overview: CAUTION!
MAY CAUSE EYE IRRITATION.
Avoid contact with eyes. Wash thoroughly after handling.

Potential acute health effects:
- Eyes: Slightly irritating to the eyes.
- Skin: Slightly irritating to the skin.
- Inhalation: No known significant effects or critical hazards.
- Ingestion: No known significant effects or critical hazards.

See toxicological information (section 11)

Section 3. Composition/information on ingredients

<table>
<thead>
<tr>
<th>Name</th>
<th>CAS number</th>
<th>% by weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>alcohols, C12-16, ethoxylated</td>
<td>68551-12-2</td>
<td>5 - 20</td>
</tr>
<tr>
<td>TETRASODIUM EDTA</td>
<td>64-02-8</td>
<td>1 - 5</td>
</tr>
</tbody>
</table>

Section 4. First aid measures

Eye contact: In case of contact, immediately flush eyes with plenty of water. Remove contact lenses and flush again. Get medical attention if irritation persists.
Skin contact: In case of contact, immediately flush skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if irritation persists. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Inhalation: Do not induce vomiting. Never give anything by mouth to an unconscious person. If irritation persists, get medical attention.
Ingestion: Do not induce vomiting. Never give anything by mouth to an unconscious person. If irritation persists, get medical attention.

Consult local authorities for acceptable exposure limits.

Section 5. Fire-fighting measures

Flash point: > 100°C
Hazardous thermal decomposition products: Decomposition products may include the following materials: carbon dioxide, carbon monoxide, nitrogen oxides, metal oxide/oxides
Fire-fighting media and instructions: Use an extinguishing agent suitable for the surrounding fire.

In a fire or if heated, a pressure increase will occur and the container may burst.
Dike area of fire to prevent runoff.

Special protective equipment: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions: Use suitable protective equipment (section 8). Do not allow to enter drains or watercourses.
Environmental precautions: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods for cleaning up: For small spills, add absorbent (soil may be used in the absence of other suitable materials), scoop up material and place in a sealable, liquid-proof container for disposal. For large spills, dike spilled material or otherwise contain it to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal.

Section 7. Handling and storage

Handling: Avoid contact with eyes. Wash thoroughly after handling.
Storage: Keep out of reach of children. Keep container in a cool, well-ventilated area. Keep container tightly closed. Store between the following temperatures: 0 and 50°C

Section 8. Exposure controls/personal protection

Engineering measures: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
Personal protection:
- Eyes: No protective equipment is needed under normal use conditions.
- Hands: No protective equipment is needed under normal use conditions.
- Skin: No protective equipment is needed under normal use conditions.
- Respiratory: A respirator is not needed under normal and intended conditions of product use.

Section 9. Physical and chemical properties

Physical state: Liquid. [Liquid.]
Color: Green.
Odor: Fragrance-like.
pH: 7.5 to 9.5 [Conc. (% w/w): 100%]
Relative density: 1.013 to 1.033

Section 10. Stability and reactivity

Stability: The product is stable. Under normal conditions of storage and use, hazardous polymerization will not occur.
Hazardous decomposition products: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
Hazardous polymerization: Under normal conditions of storage and use, hazardous polymerization will not occur.
